SlimStar T8020

Wireless Multi-TouchPad Keyboard

Genius
Live with Ideas

Windows 8 Compatible

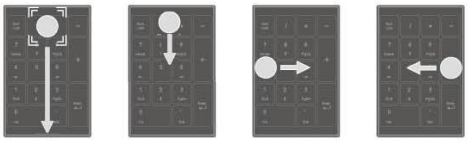
Experience Windows 8 operating system using the next generation wireless keyboard and TouchPad combination from Genius, SlimStar T8020. This multi-touchpad keyboard offers reliable 2.4GHz transmission for superb working smoothness and uninterrupted connection. SlimStar T8020 allows you to switch between three different modes: mouse cursor, Windows 8 gestures, and numeric keypad mode by just pressing the MODE key. The multi-touchpad provides these Windows 8 gestures: slide, swipe, swipe from four edges, zoom in/out, and page up/down, with no additional PC driver required, and also supports the majority of basic gestures in Windows 7/Vista/XP. Additionally, there are eleven function keys for media control, Internet access and power off computer, giving you instant access controls so you can accomplish tasks faster. All these features let you easily enjoy the Windows gestures and great tactile typing feedback with the SlimStar T8020.

Advanced 2.4GHz Multi-TouchPad keyboard

Quick access to Windows® 8 gestures

Easily access your favorite Apps on **Windows® 8 gestures** with a simple dedicated action.

Watch how you can power through Windows® 8 with touch gestures for a human-oriented navigation.



Close existing application | Open the application list | Switch between existing applications | Open charms
